

2013 - 65 years of innovation

Today Bailey employs over 300 local people on a 14.5-acre South Bristol site and currently manufactures 7,500 leisure vehicles per year to generate an annual turnover in excess of £ 90 million.

Bailey remains the UK's number one caravan brand, accounting for approximately one in three new caravan sales, and is also now one of the largest in Europe. More recently the company has brought this same level of expertise to new product sectors including motorhomes and leisure homes, which are caravans designed specifically for siting on seasonal pitches, as well as expanding to new exports markets such as Australia and New Zealand.
